EDUCATION

B. Tech in Computer Science and Engineering

Galgotias University, Greater Noida

2024 – 2028

(Currently) CGPA: 9.12

Senior Secondary Education

Sarvodaya Bal Vidyalaya

2021 – 2023

Class 12: 78.0%, Class 10: 82.0%

TECHNICAL SKILLS

Programming Languages Java, C, MySQL

Core CS

Data Structures & Algorithms, Problem Solving, OOP, DBMS

Software & Tools

Scilab, Git, GitHub, Solidworks, Canva

Frameworks

Servlets & JSP

PROJECTS

RetroKey - Mirror Typing Reflex Game

[GitHub](#) | Nov 2025

- Developed a Java Swing–based desktop typing reflex game, **RetroKey**, featuring dynamic mirror-typing challenges and real-time accuracy feedback.
- Implemented core game mechanics and GUI components to ensure intuitive gameplay and seamless theme switching.
- Designed and integrated a web-based admin panel using Servlets, JSP, and CSS to manage word lists and monitor gameplay statistics
- Utilized JDBC with MySQL to securely store game data and leaderboard records.

FemFort - Safe Campus Route Guiding Web Application

[GitHub](#) | Dec 2025

- Developed the frontend UI for a safe campus route guiding web application using HTML, CSS, and vanilla JavaScript.
- Designed and created visual assets and UI components to ensure clarity, accessibility, and ease of navigation.
- Implemented interactive frontend features to enhance user experience and route guidance workflows.

ZEROedIn - Number Guessing Game

[GitHub](#) | May 2025

- Developed a Java Swing–based number guessing game with an interactive desktop interface.
- Implemented core game logic to handle user input, validation, and result feedback.
- Integrated database connectivity to store and retrieve gameplay data using JDBC.

Lost n found - Lost and Found Web Application

[GitHub](#) | Oct 2025

- Developed the frontend UI and page layouts using HTML, CSS, and JavaScript for a lost and found web application.
- Implemented database integration to store and retrieve lost and found item details.
- Enabled basic data flow between the user interface and database to support item posting and lookup.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Solved **100+** problems on various coding platforms.
- Participated in SynapHack 3.0 Hackathon organized by college crave (2025).
- Participated in WIE hackathon organized by IEEE (2025).

LEADERSHIP & COMMUNICATION

- Successfully participated in teams across multiple major hackathons.
- Collaborated with team members as a DevCircle Editor Member to support club activities and create posters.
- Experienced in collaborative, multi-member engineering teams.
